Sample Collection and Shipping Instructions

TO COLLECT SAMPLES:

- Use 100mL, 500mL or 1000mL plastic bottle, amber and sterile if possible.
- Remove the cap from the sample bottle and fill one-half of the bottle.
- Recap the bottle and shake a 2-3 times.
- Pour all of the water out.
- Then, refill the bottle a second time to the neck of the bottle.
- Recap the bottle tightly.
- Properly label bottle(s) - see below.
- Refrigerate sample(s).

SHIPPING INSTRUCTIONS:

Carefully complete bottle labels with your name, date and time of sample collection, and the sample location (i.e. well head, outdoor faucet, body of water with algae blooms). Place the bottle(s) and **ice**, with the completed instruction sheet (inside plastic baggie) in the ice chest. Seal the box and either deliver or ship the kit to:

**ATTOGENE CORPORATION
3913 TODD LANE SUITE 310
AUSTIN, TEXAS 78744**

We accept samples Monday through Friday from 8:00 am to 4:00 pm.
For holiday schedules or questions, call 512-333-1330 Monday through Friday, 8:00 am to 5:00 pm.
